May 2021 - Apr 2022

- https://www.ekahau.com/products/ekahau-connect/insights/
- Web-based application that provides transparency across global wi-fi networks, network health visualization, automated analysis, and potential issue identification. More info in the link above.
- Developed the Ekahau-insights product together with the multinational Ekahau cloud team.
- Mentoring the team's junior software engineers.

SIEMENS
Helsinki, Finland

Software Engineer - Digital Industries
Jan 2020 – May 2021

- Built a template application using Angular with re-usable UI components to facilitate faster software development and simplify starting a new customer project.
- Helped integrate new graduates and junior software engineers into the digital industries development team.

Junior Software Engineer – Digital Industries
Mar 2018 – Jan 2020

- Started working at Siemens Finland during my university studies as a junior software engineer.
- Built web-based applications for Siemens' Nordic European customers (such as Orkla, Valio, Raisio Group) that provided insights into their manufacturing processes and key performance indicators.
